# Prohibited Items List Implementation Delay

Tuesday, April 23, 2013

## Statement

"In order to accommodate further input from the Aviation Security Advisory Committee (ASAC), which includes representatives from the aviation community, passenger advocates, law enforcement experts, and other stakeholders, TSA will temporarily delay implementation of changes to the Prohibited Items List, originally scheduled to go into effect April 25. This timing will enable TSA to incorporate the ASAC's feedback about the changes to the Prohibited Items List and continue workforce training."
